

Visible Style Gas Pump Replica

Before the common use of electric powered gas pumps, simple gravity helped to fill your tank. Fuel filled the clear cylinder by manually pumping the side handle. Once filled, gravity fed the fuel from the cylinder to your tank! Original pumps stood as high as 15! We've shrunk ours down to 7'6" to fit in the common 8' ceiling. High-gloss gel coat finish is complimented with decorative hose, nozzle, steel pump handle with hand-carved wooden grip. Illuminated globe assembly with decal for the pump base.

110 Volt. UL Listed. Made in the U.S.A.

Dimensions: 7'6" H x 1'9" D

Weight: Approximately 50 lbs.

Item No: NV72

Mini Visible Gas Pump Gumball Machine

Fill 'er up! with this mini gas pump gumball machine. Illuminated globe assembly sits on top, with nearly 1,000 one inch gumballs stored below.
